***Continued Examination Under 37 CFR 1.114***

1. A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on 6/29/2006 has been entered.

***Response to Arguments***

2. Applicant's arguments, presented by the applicants representative in an interview conducted on 6/19/2006, with respect to rejection(s) of claims 1-3, 9-17,21-28 under 35 U.S.C 103(a) as being unpatentable over Polla et al (US 5,911,507) in view of Ma (US 6,677,709) and further in view of McNie (US 6,670,212) have been fully considered and are persuasive. The final rejection(s) of claims 1-3, 9-17,21-28 under 35 U.S.C 103(a) has been withdrawn.

***Allowable Subject Matter***

3. Claims 1-35 allowed.

The following is an examiner's statement of reasons for allowance:

Regarding claim 1, the applicants representative have presented persuasive arguments, see pages 10-11 of the response filed on 6/29/2006 that FIG.

Art Unit: 1765

40 of the Polla et al. reference fails to disclose "patterning the upper protective layer....to the upper electrode layer" and one skilled in the art at the time the invention was made would not have found it obvious to combine Polla method and Ma teaching because Ma discloses, at most, laminating a separately-prepared piezoelectric MEMS element onto a flexible substrate, whereas claim 1 recites a method for forming a flexible MEMS transducer that includes, inter alia, depositing a lower electrode, an active layer and an upper electrode on a sacrificial layer disposed on a flexible substrate. Regarding claim 31, the applicants representative have presented persuasive arguments, presented by the applicants representative in an interview conducted on 6/19/2006, that the Polla reference fails to disclose a step of "forming a sacrificial layer on the planar surface .....to the lower surface", in combination with the rest of the steps of claim 31 since Fig. 4e of Polla shows that sacrificial layer 64 is formed on an uneven surface 12

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
